

Covid & Safety Policy – As of January 2026

Travel Testing

While Dynamy no longer requires proof of COVID-19 vaccination or a negative test for enrollment, we strongly recommend all participants and staff follow any and all travel advisories while traveling to Dynamy. This includes:

- **Pre-Dynamy Testing:** Although testing is not currently required, students and staff are encouraged to take a COVID-19 test before traveling to Dynamy particularly if they are feeling unwell or have been in a high-risk setting.
- **After-Arrival Testing:** If required by local policies or as a personal precaution, students may take a covid test when they arrive at Dynamy or go to the nearest urgent care testing facility.

Note: It is the responsibility of the student to stay informed of any changes to policy enforcement requirements before arriving at Dynamy. Testing costs are typically the responsibility of the student; however, they can request one from Dynamy staff.

Exemptions and Additional Safety Measures

For those who are exempt from vaccination or unable to take a test for medical or religious reasons, the following applies:

- **Medical Exemptions:** A valid medical certificate from a licensed healthcare provider must be provided.
- **Religious Exemptions:** A written statement describing the sincere religious belief preventing vaccination or testing must be submitted.

Exempt individuals may be required to follow additional safety measures, such as:

- **Regular Testing:** Those who cannot receive the vaccine or provide test results may need to submit to regular testing (e.g., weekly or as needed based on risk level).
- **Masks & Social Distancing:** These individuals may be required to wear masks or maintain physical distancing in certain group settings and work environments.

Policy Review and Updates

This policy will be reviewed and updated periodically to stay updated with the latest public health guidelines and travel regulations. Students and staff will be notified of any significant changes to this policy as soon as we become aware of them.
